Dear Governor Cooper,

Please do not further the speed of our climate over a fossil fuel that has been proven to be harmful to the future of our planet. Please do not worsen the pain of the planet and harm our precious NC coast so that my children and all the generations to come can enjoy what we have. You are in the seat of power now and represent many of us. **Please hear our voices that we are asking and begging you not to allow approval for the Atlantic Coast Pipeline tomorrow.** Tonight my heart sits heavy and I ask you to deeply consider how natural gas is not the answer for our country to progress into the future. Solar, wind and other viable options are far more gentle on our planet and are indeed the future that all nations should be moving in. The choice to ride this wave of natural gas until it no longer pays those who benefit and watch it harm our planet need leaders like you to say NO and stop the harm of all. We need leaders represent the citizen of our country and stay that make choices that hold the vision of well being for our planet's future, all our citizens and all generations to come. Can you step up to the plate and this real call to show who you really are? Say no to greed and harm. I beg for you to represent me and all those who care for more than greed and resource blindness.

Sincerely,

Sommer Sobin
Chapel Hill, NC
Mother of 2 young children
